

Notes on the CPD types and conditions update

The Continuing Professional Development – Types and Conditions Guide was approved by the Engineers Australia Board in December 2024.

The guide has amended “Conditions” to apply to any CPD period (in the case of individuals who are granted a five-year extension).

In the Type II category, “technical inspections and technical meetings” were removed and “webinars” added. However, technical inspections and site visits for learning purposes may still be claimable. For technical inspections and meetings to be claimable, “new” or “refreshed” knowledge and/or skills must be gained.

If you participate in an activity that is not covered in this guide, it may still be considered as valid CPD if there are engineering learnings you can reflect on.
